

AGARI - ON A MISSION

TO ELIMINATE EMAIL AS A CHANNEL FOR CYBER ATTACKS

Through the rise in digital engagement globally, email is dominating both enterprise and consumer communication. However, email, despite its importance, ubiquity, and staying power, has a fatal flaw – it was created without proper security measures. This flaw has put the power of the world’s most admired brands in criminal hands, inflicting direct losses to businesses and their customers – and eroding the brand equity companies have spent years building up.

Phishing campaigns targeting consumers cost financial institutions and other global brands over \$4.5B last year, with no end in sight. And with 73% of Americans online every day, insecure email channels are left wide open for devastating criminal abuse.

Consumer phishing harms your customers by exploiting their trust in your brand. Spear phishing harms your enterprise by exploiting employees’ trust in their colleagues, partners, and customers.

“The Agari platform eliminates email as a channel for cybercrime, enabling businesses to interact and transact safely and securely.”

THE
AGARI
PLATFORM
IS THE ONLY SECURITY
SOLUTION
THAT CAN
DETECT
AND
PREVENT
FRAUDULENT
EMAIL MESSAGES FROM EVER
BEING RECEIVED

A Different Approach to Email Security

The award-winning Agari platform takes a holistic approach to email security, identifying and preventing both inbound and outbound email cyber-abuse. The Agari SaaS platform automatically builds a trusted, authentication-based model for the enterprise email ecosystem and is the only security solution that can detect and prevent fraudulent email messages from ever being received.

The Agari engine processes more than 7 billion messages each day, monitoring more than 2.5 billion mailboxes, identifies over 2 million malicious URLs per month, and blocks more than 200 million malicious emails per month.

The Right Solution for the Enterprise

Through Agari's suite of products, businesses are able to:

- › Secure the **outbound email ecosystem**, ensuring every email sent from your domain is authentic, and no fraudulent emails can be delivered purporting to come from your organization.
- › Receive immediate and actionable **threat intelligence** to help you take down imposter websites and warn your customers about active imposter attacks coming from domains you do not own.
- › Protect your organization in real time from targeted **spear phishing attacks** and executive level spoofing, shutting down attacks before they impact your reputation and your revenues.

With the powerful Agari platform, global brands can eliminate email as a channel for cybercrime, enabling businesses, through their employees and customers, to interact and transact, safely and securely. Learn more by visiting www.agari.com.
