Phishing and BEC attacks represent a significant, ongoing threat to business. It’s critical to understand the strategies and tactics targeting your organization and defend against the ever-present risks, along with the potential financial liabilities that come with them.

**Phishing Is a Game of Cat and Mouse**
Cybercriminals utilize digital reconnaissance and evolving social engineering techniques to stay one step ahead of your defenses and launch sophisticated attacks targeting your employees. Building internal expertise to engage with these email threat actors is expensive, time-consuming, and challenging to operationalize.

**Actionable Threat Intel**
Agari Active Defense BEC Threat Intelligence service gives your team the tailored, high-value insights you need to understand threats, optimize defenses, and reduce risk.

Using active engagement capabilities, the Agari Cyber Intelligence Division (ACID) uncovers and disarms criminals’ tactics and techniques. The result: highly-focused, actionable intel about specific BEC threats targeting your organization.

**Active Engagement**
The ACID threat analysts’ extensive expertise in email security is supported by advanced technology that collects threat intelligence at scale. This active engagement with threat actors targeting your business uncovers actionable insights and visibility no other threat intelligence solution can provide.

---

AT A GLANCE
Agari Active Defense BEC Threat Intelligence service gives you actionable intelligence to understand threats and reduce risk from BEC attacks.

**THE AGARI ADVANTAGE**
- **Unmatched expertise.** Unique visibility into the BEC attack chain and insights your team can’t get anywhere else.
- **Detailed reporting.** Tailored reports that provide your team with the insights they need to manage BEC risk.
- **Active engagement.** Extensive expertise in email security supported by advanced technology that collects threat intelligence at scale.
- **Better outcomes.** Actionable intelligence to phishing and BEC attacks by understanding the strategies and tactics being used.
- **Strategic partnership.** An ongoing, strategic relationship between security analysts in the Agari Cyber Intelligence Division and your team.

Your BEC Threat Intelligence Report

Security teams need to share information across departments, but it can be challenging to efficiently collect and organize threat intelligence.

Each month, the Agari Active Defense BEC Threat Intelligence service delivers tailored reports that provide your team and stakeholders with the insights they need. The data and insights in each report reflect the unique characteristics of the specific attacks targeting your organization, including:

- Analysis of the scope, shape, and objectives of BEC attacks
- Identification of most-impersonated executives
- Information about most-targeted employees
- Intelligence about threat actors and attack origins
- Detail of compromised and mule accounts
- Full samples of Active Defense email engagements

Experts from the Agari Cyber Intelligence Division will meet with your team to understand your intelligence requirements, review findings, and make key recommendations.

Drive Better Outcomes

As with any adversary, stopping phishing and BEC attacks gets easier when you learn about and understand the strategies and tactics being used.

Armed with the insights from Agari Active Defense BEC Threat Intelligence, your team will understand BEC threats, optimize defenses against attack, and manage your organization’s risk.

EDURE Threats

- Expose BEC attack cycle
- Capture threat actor intel
- Identify employees at risk
- See methods of exploiting compromised accounts

Optimize Defenses

- Supplement security awareness training
- Support red team initiatives
- Provide data for system instrumentation

Reduce Risk

- Keep stakeholders informed about BEC risks
- Monitor and reduce losses
- Benchmark BEC risk exposure against peers

A Strategic Partnership

Agari Active Defense BEC Threat Intelligence service represents an ongoing, strategic relationship between security analysts in the Agari Cyber Intelligence Division and your organization’s security, fraud prevention, and risk management teams. The service is designed to complement Agari Phishing Defense™, Agari Phishing Response™, and Agari Brand Protection™ deployments.

Make sure your team has the actionable intel it needs to understand BEC threats, optimize defenses, and reduce and manage risk.
