

SOLUTION BRIEF

Agari Secure Email Cloud™

Detect, defend against, and deter email attacks that evade legacy email security controls.

TRANSITIONING TO THE CLOUD

More than half of all businesses have migrated their email and productivity tools to the cloud. Now, it is time for email security to move into the cloud era to stop the latest generation of cyber attacks that camouflage themselves within trusted communications.

Modern cybercriminals are evading legacy Secure Email Gateway (SEG) and first-generation Advanced Threat Protection (ATP) systems that can only stop known attacks. In contrast, the next-generation Secure Email Cloud is built on predictive AI that can stop evolving zero-day attacks by leveraging massive data sets, data science, and the power of cloud computing.

Agari Secure Email Cloud™

“Advanced threats (such as ransomware and business email compromise) are easily bypassing the signature-based and reputation-based prevention mechanisms that a secure email gateway (SEG) has traditionally used.”

Gartner Market Guide for Secure Email Gateways
ID G00320003

AT A GLANCE

The Agari Secure Email Cloud software as a service (SaaS) solution gives your employees, customers, and partners the confidence to open, click, and trust everything in their inbox.

BENEFITS

Accelerate digital business

by establishing trust in email communications, increasing revenue, and improving employee productivity.

Protect your brand by implementing DMARC authentication.

Stop advanced email threats

including business email compromise, spear phishing, and account takeover-based attacks.

Automate incident response and remediation to prevent breaches and save SOC analyst time.

Deter cybercriminals by gathering counterintelligence and providing it to law enforcement.

THE AGARI ADVANTAGE

The Agari Identity Graph™ uses predictive artificial intelligence to model trustworthy communications, based on 300+ million daily updates.

Machine learning models

personalize threat detection to provide adaptive email protection.

Complete protection secures your email ecosystem against every type of advanced email threat—inbound and outbound.

Intuitive dashboards show advanced analytics, allowing you to quantify the value of protecting your email channels.

STOP EMAIL ATTACKS WITH PREDICTIVE AI

The Agari Secure Email Cloud is the first advanced email security solution that can detect, defend against, and deter modern cybercriminals so that humanity prevails over evil. The Secure Email Cloud includes:

AGARI BRAND PROTECTION™

Protects brands from being used in phishing attacks against consumers, avoiding fraud costs and improving email marketing effectiveness.

AGARI INCIDENT RESPONSE™

Automates the process of phishing incident response, remediation, and breach containment.

AGARI BUSINESS FRAUD PROTECTION

Stops attackers from spoofing corporate email domains to target B2B customers, partners, and employees.

AGARI BEC AUTOMATED DECEPTION SYSTEM™

Deters cybercriminals by baiting them into giving up intelligence about their identity, tactics, and victims, which is then shared with law enforcement to bring them to justice.

AGARI ADVANCED THREAT PROTECTION™

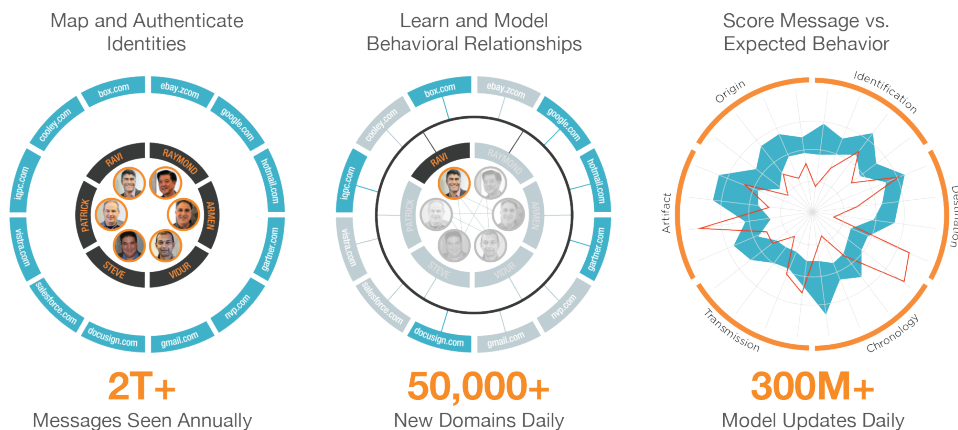

Prevents advanced email attacks from getting to employee inboxes.

“With the adoption of Agari, we are enhancing our employees’ overall trust level in their email, taking the safety and security of our members, clients, and employees to the next level.”

Aetna

POWERED BY THE AGARI IDENTITY GRAPH™

The Agari Identity Graph is a high-performance graph database of relationships and behavioral patterns between individuals, brands, businesses, services, and domains using hundreds of characteristics to define trusted communications. With over 300 million model updates per day, the Agari Identity Graph is constantly getting smarter as it uses artificial intelligence to automatically learn, based on visibility into more than 2 trillion emails annually.
