

Large Enterprise Insurance Company

Introduction

This case study of a large enterprise insurance company is based on a January 2018 survey of Agari customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Agari Enterprise Protect has successfully blocked all types of attacks since we implemented it. We are primarily concerned with our executives and targeted spear phishing.”

Challenges

The profiled company evaluated and ultimately selected Agari Enterprise Protect to:

- Protect against business email compromise and executive spoofing attacks
- Protect against spear phishing attacks
- Improve incident response and forensics for targeted email attacks

Use Case

The company uses Cisco as their existing Secure Email Gateway and FireEye to provide Advanced Threat Protection for routine inbound email threats.

The company chose Agari Enterprise Protect to shield themselves from spear phishing and business email compromise/executive spoofing.

Results

The surveyed company achieved the following results with Agari Enterprise Protect:

- Replaced SEG as part of migration to cloud-based email
- Prevented advanced email-based attacks that were bypassing existing security

The company's rating of Agari's detection and prevention capabilities:

- Advanced email attacks: significantly better than the competition
- Impostor based attacks: significantly better than the competition
- Incident response & forensics: better than the competition

“We were able to identify and block advanced email attacks that SEGs missed by using Agari Enterprise Protect”.

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Large Enterprise

Industry:
Insurance
