

## Large Enterprise Computer Software Company

### Introduction

This case study of a large enterprise computer software company is based on a January 2018 survey of Agari customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“We were able to identify and block advanced email attacks that SEGs missed by using Agari Enterprise Protect”.

### Challenges

The profiled company evaluated and ultimately selected Agari Enterprise Protect to:

- Protect against business email compromise and executive spoofing attacks
- Protect against spear phishing attacks
- Improve incident response and forensics for targeted email attacks

### Use Case

The company uses Microsoft Exchange Online Protection as their existing Secure Email Gateway and Microsoft ATP to provide Advanced Threat Protection for routine inbound email threats.

They chose Agari Enterprise Protect to shield themselves from business email compromise (BEC) and executive spoofing.

### Results

By using Agari Enterprise Protect the surveyed company prevented advanced email-based attacks that had been bypassing existing security.

The company's rating of Agari's detection and prevention capabilities:

- Advanced email attacks: better than the competition
- Impostor based attacks: better than the competition
- Incident response & forensics: better than the competition

#### Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:  
**Large Enterprise**

Industry:  
**Computer Software**
