

US Federal Government

Introduction

This case study of a federal government is based on a January 2018 survey of Agari customers by TechValidate, a third-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

“Agari handles the heavy lifting to implement DMARC. We have been able to manage DMARC for a large portfolio of domains because of Agari’s service. As a result, we saw a substantial decrease in the number of spoofed emails for our domains.”

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Agari Customer Protect included the need to:

- Prevent cybercriminals from phishing customers using their brand to commit fraud
- Improve deliverability of legitimate email from authorized senders

Use Case

The key features and functionalities of Agari the surveyed organization finds most valuable include:

- DMARC, SPF, DKIM Email Authentication Policy Management
- Third-Party Email Sender Discovery, Management & Governance
- Visibility, Forensics & Threat Intelligence
- Brand Abuse Monitoring

Results

The surveyed organization rates following capabilities of Agari Customer Protect better than the competition:

- Achievement of authentication goals
- Ease of use
- Reporting & forensics
- Third-party sender management
- DMARC expertise

The company has realized the following benefits as a result of implementing Agari Customer Protect and achieving DMARC Reject:

- Prevention of phishing on domains
- Increased trust & protected value of brand
- Email governance, compliance and prevention of shadow IT
- Protection of newly acquired domains (i.e. defensive, M&A)
- Detection and management of new third-party email senders for their domains

Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Organization Size:
Federal

Industry:
Government
