

Join the Agari Partner Network

Partner with the leader in predictive Artificial Intelligence solutions for advanced email threats

ACCELERATE YOUR CUSTOMERS' DIGITAL TRANSFORMATION WITH AGARI

\$12.5B Total losses tracked by the FBI from Oct 2013 to May 2018

54X Increase in attacks since 2015

96% Organizations targeted by BEC attacks, based on Agari research

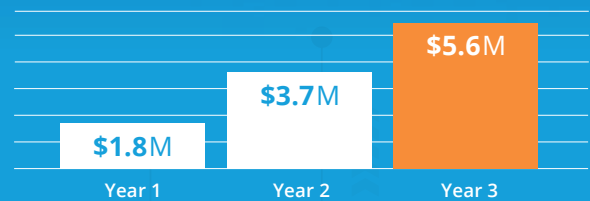

Agari Enterprise Protect

Agari Enterprise Protect™ helps protect employee inboxes from attacks like Business Email Compromise (BEC), Spear Phishing and Account Takeovers, where fraudsters pose as trusted people or organizations to acquire sensitive information or gain unauthorized access to critical business systems.

Agari Customer Protect

Agari Customer Protect™ helps protect your customers' brand from impersonation in phishing attacks. It automates email authentication using the DMARC standard, blocking attacks before they reach your customers, partners and vendors.

Agari 3 Year Customer Net Benefit @ 326% ROI

WHY PARTNERS LOVE AGARI

Channel-Friendly Business Model

High margin discounts, deal registration protection and available co-marketing programs

Commitment to Our Partners

Dedicated channel managers for partner clinics, trainings and business reviews

Right Solution that Meets an Immediate Demand

Protects the cloud inbox from advanced email and phishing attacks

AGARI PROTECTS 70% OF GLOBAL INBOXES

BENEFITS OF THE AGARI EMAIL TRUST PLATFORM

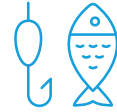

Stops Advanced Inbound Email Attacks that SEGs Miss

Leverages artificial intelligence to stop advanced email threats, including BEC, spear-phishing, or ransomware

Keeps Users and Admins Productive

No reliance on manually created rules, user training, or out-of-band content analysis

Stops Consumer Phishing and Eliminates Brand Abuse

Agari models an organization's email behavior to publish a DMARC enforcement policy that blocks delivery of unauthorized email

PROTECTING COMPANIES AND AGENCIES FROM EMAIL ATTACKS

Agari's Email Trust Platform, deployed by Fortune 1000 companies and government agencies, is the only solution that effectively stops advanced email attacks by identifying the true sender of emails. Agari's proprietary analytics engine and email telemetry network provides unparalleled visibility into over 2 trillion emails every year across 3 billion mailboxes. This insight drives the company's **Identity Intelligence™** machine learning engine, which uniquely enables enterprises to stop attacks against their employees and customers.

Key benefits include:

- Only advanced email security solution that detects all types of Identity Deception including domain spoofing, display name deception, look-alike domains and **account takeover-based attacks**
- Protects against low volume, highly-targeted **socially-engineered attacks**
- Agari continues to lead the pack in outbound email authentication (**DMARC**), helping more companies to implement enforcement (Reject or Quarantine) than all other vendors combined

About Agari

Agari is the leading predictive Artificial Intelligence (AI) solution to protect the cloud inbox from advanced email and phishing attacks. Winner of **Best Email Security Solution by SC Magazine in 2018**, the **Agari Email Trust Platform™** prevents ransomware, ATO, phishing, BEC and other identity deception attacks, restoring trust to digital channels for businesses, governments, and consumers worldwide.
